

Job description: Metal Fabricator – Lead Hand

We are seeking a skilled and motivated Lead Hand to join our dynamic team in our Fab Shop! The Lead Hand will play a crucial role in overseeing daily functions in the shop, ensuring that projects are completed efficiently and to the highest standards. This position requires a strong background in the daily use of Laser, Brake Press, Saw and Drill equipment, with expertise in various technical skills. The ideal candidate will demonstrate leadership qualities, mechanical knowledge, and a commitment to safety.

Join our team as a Lead Hand where your skills will contribute to our success while fostering an environment of growth and innovation!

Responsibilities

Supervise and coordinate the activities of the fabrication team to ensure timely completion of projects.

Provide hands-on support in fab shop tasks, as needed.

Train and mentor crew members on best practices for using machinery and tools.

Ensure compliance with safety regulations and maintain a clean work environment.

Interpret blueprints and schematics to guide project execution.

Utilize various tools such as calipers, power tools, and hand tools for precise measurements and assembly.

Collaborate with other departments to streamline processes and improve efficiency.

Skills

Proficient in Brake and Laser equipment operation, techniques and mechanical knowledge.

Strong ability to read blueprints and schematics, and communicate effectively.

Competence in basic math for accurate measurements and calculations.

Knowledge of forklift operation and overhead crane for material handling.

Ability to work with hand tools and power tools safely and efficiently.

Previous experience in manufacturing environments required.

Experience

Brake Press: 3 years (required)

Lead Hand/Supervisory: 1 year (required)
