

# Cadman BROADCAST CART SYMMETRICAL & ASYMMETRICAL

SINCE 1952

50

YEARS OF  
EXCELLENCE

**Cadman**  
POWER EQUIPMENT  
*Limited*

The Cadman Broadcast Cart is excellent for watering crops grown under a shade or canopy, or for areas that are subject to high wind. An alternative to high cost/high maintenance booms, the Broadcast Cart operates in the same manner as a regular traveller gun cart. Simply pull out the cart on your traveller and begin to wind in the hose. The cart will provide even distribution with a spread pattern between 120 to 200 feet in width.

**THE CADMAN BROADCAST CART DIFFERENCE**  
strength... simplicity... dependability

# SYMMETRICAL & ASYMMETRICAL BROADCAST CART

Each Broadcast Cart has a heavy duty gear box that operates two 1" sprinkler tubes. Each tube comes with a set of seven rings to change flow and diameter. As well, the trajectory of the tubes can be changed from  $-15^{\circ}$  to  $+15^{\circ}$  by simply turning the adjustment screws.

Asymmetrical Broadcast Cart in operation at a ginseng farm.

Run by a 4 HP Honda motor, a reduction gear box provides power to operate the two sprinkler tubes.

See your irrigation representative about Cadman's complete line of irrigation products.
